Streaming solutions...

Live streaming

The world has changed and so have our broadcast streaming options. We can offer a range of live streaming solutions so that you can deliver your live stream, webinar or virtual conference in the smoothest, most effective way.

We work with our clients to ensure each streaming solution is tailored to fit their needs. Whether it's in our studio, on location or completely virtually our approach is consistent to deliver the highest quality online broadcast.

The following document outlines in brief what is on offer and will give you an idea of what's possible. We are always committed to finding the right solution for you, so please get in contact to discuss your project further.

Millions of streams in 2020...

We are proud to have worked for so many channels, production houses, blue chip companies and brands. We would love to add you to our list.

**We can
make it
work...**

Our studio

Our in-house team are experts & can deliver high-quality production values for your broadcast. We have over 25 years television and 17 years streaming experience so whatever your requirements we can deliver a solution that works for your business.

Studio facilities & solutions

Live mixed 4K Multi-Camera

Dynamic Lighting Design

Green Screen Studio

Complex motion graphics

Virtual studios

Remote contributors via internet

Chat-show set-up

LED solutions

Immersive graphical environments

Creative Set Design

Full virtual hybrid events

Ted Talk style single presenter

Full 4K MCR for event production

In ear and on camera prompting

On location

Our services are 100% mobile. Whether running an event from your own offices or on location, we have years of experience delivering the highest quality live streaming solutions wherever its required around the globe. We can dovetail with your existing facilities, in-house equipment and suppliers or we can bring a complete solution and build a fully functioning professional MCR to deliver world class programming wherever it's needed. We have all the tools to deploy a seamless steaming service, calling on satellite IP, 4G bonded services and 5G.

In September 2020 we completed 40 hours of live stream content over 6 days from multiple locations around the globe, about the UN's SDG's.
